

# Agility and Adaptably

**A Strategy is an integrated set of feasible choices to gain a competitive advantage, while navigating constraints and uncertainties**

1. What is our winning aspiration?

2. Where do we want to play?

3. How will we win?

4. Which capabilities must we have or develop?

5. Which management systems do we need to support the strategy?

# A strategy is about the future, so sut have assumptions

# The goal be sensitive for new insights and adapt strategy and plan as needed
